EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the abstract, line 2, change "polymer" to –polymers—and change "have large" to –have a large--.

In the abstract, line 4, after "preparation of" insert –a--.

In claim 1, 2nd to last line, change "to give" to –to obtain--.

Allowable Subject Matter

2. Claims 1-14 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose applicant's method for the preparation of conducting/semi-conducting polymer having high piezo-sensitivity and which can be easily made at low temperature and used at low electric fields.

Applicant's method can be distinguished from prior art by the acts of polymerizing a monomer in an aqueous medium containing initiator and dopant, precipitating the polymer, drying and crushing the polymer, adding to a second polymer with solvent, casting from solution, and applying a voltage from 50 V to 100 V to the cast film placed between two electrodes.

An advantage of applicant's invention is the lower voltage (i.e. safer voltage) needed to obtain a high piezo-sensitivity, as compared to the kV levels in the prior art poling techniques.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
